

IR Spectrometry Solutions

Our Mission is...

To sustain commercial success as a mineral supplier by providing the highest quality products backed by superior service at competitive prices.

CS-230 Carbon Sulfur Analyzer, by LECO

- Elemental determination of Carbon and Sulfur.
- Can easily handle most sample forms including: solids, powders, millings, and chips.
- Rapid results using combustion/fusion technology.
- Approved methodologies by ASTM and other organizations.
- Accurately covers ranges from ppm to high weight % levels.

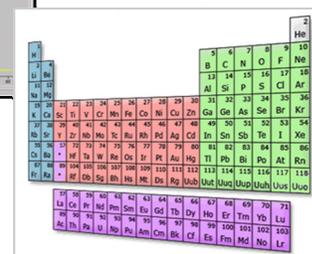

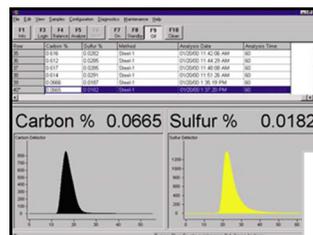

300 N Pekin Rd
Woodland, WA 98674

Phone: 360.225.6505

Dual Analysis...

- Simultaneous carbon/sulfur calibration
- Infrared absorption measurement
- Powerful 18 MHz, 2.2 kW induction furnace
- High temperature combustion

Insuring the best products we can deliver...

- Routine testing of incoming raw material
- Consistent high purity limestone through CaCO_3 content monitoring
- Developing new products utilizing multiple sources of the purest minerals

What we can do for you...

- Analyze unknown organic carbon and sulfur amounts
- Create customer specific applications
- Help identify contamination issues
- Process samples for fast & accurate results

We help our customers find answers!
