

MICRONA™ Poultry Grit

Beneficial Supplement

MICRONA Poultry Grit is composed of high quality calcium carbonate, a naturally occurring mineral helpful for layers on scratch feeds or pasture fed when provided free-choice.

Why Calcium Grit?

Because laying hens need high levels of calcium to form eggshells, an additional source of calcium is beneficial.

According to Dr. A. Bruce Webster, Extension Poultry Scientist, University of Georgia, "The skeleton of a typical modern egg-laying breed of hen only contains about 20 grams of calcium, each egg represents 10% of the hen's total bodily calcium. While the hen's skeleton acts as a calcium reserve to supply the demands of egg production, this reserve is rapidly depleted in the absence of an abundant calcium source in the feed eaten by the bird."

Webster recommends feeding a prepared layer ration with calcium or at least providing a particulate source of calcium, e.g. suitably sized ground limestone or oyster shell, that the birds can eat selectively according to their needs.*

Coup Hygiene

Help to keep your chicken coop hygienic and clean. After your routine clean-out of the chicken house and yard, spread MICRONA™ Poultry Grit on the ground (about a handful per square foot), then spread your bedding material. The calcium carbonate that is in the MICRONA™ Poultry Grit will decrease acid build-up and sweeten the soil.

Delivers predictable, repeatable results

MICRONA Poultry Grit is easily integrated into your poultry management program. Aiding digestion, providing calcium and the added benefit of coup acid neutralization, MICRONA delivers predictable, repeatable results to improve farm profitability.

Delivers predictable, repeatable results. Always has. Always will.

MICRONA™ Poultry Grit

A free-choice grit source composed of calcium carbonate.

- Pure Calcium carbonate grit
- Increases coop hygiene
- Available in pullet and hen sizes
- Approved organic OMRI listed material
- Alternative use as a traction grit that's easy on landscape when traction is needed. Does not change soil pH

Calcium grit should be provided free choice to poultry in a pan or trough or sprinkled on the ground.

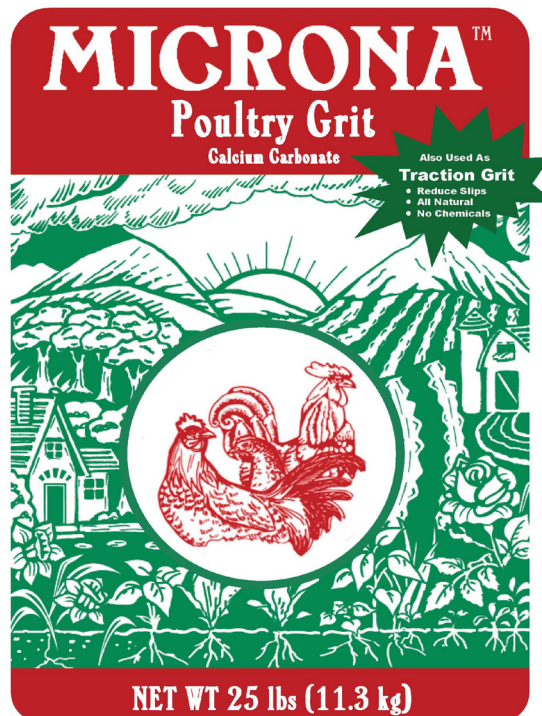

Ingredients: Ground Limestone

MICRONA Poultry Grit 6 x 10 aka Traction Grit is the perfect size for mature laying hens to support calcium needs and digestion.

Available in 50 lbs and 25 lbs bags. 6 x 10 is very useful as traction grit during the winter season.

MICRONA Poultry Grit 8 x 20 is a smaller size for smaller poultry and young chickens 6 - 20 weeks.

Available in 50 lbs bags.
